EDUCATION

B.A. Gastronomy

Universidad de La Sabana
2014 – 2019

LANGUAGES

English

Full professional

Spanish

Native

PROFILE

Product designer with **8 years** designing end-to-end product and conversion-focused commerce experiences, now working AI-native. I design the **Ferrero digital shelf** across major US marketplaces, and I designed, coded and run **my own Shopify store** — built with **Claude Code** from design to production. AI moves me faster on research, prototyping and code while human judgment and craft stay at the center. Fully remote with US teams since 2018.

EXPERIENCE

Founder, Designer & Developer

Jun 2026 – Present

Mariana Ordoñez Art · tienda.mordonez.com · Self-employed

- Designed, coded and run a **DTC Shopify store** for original watercolors, limited editions, cards, digital downloads and commissions.
- Built a **custom Shopify theme** (Liquid, HTML, CSS, JS) with an AI-assisted development workflow — from design to production — plus a guided commission configurator.
- Applied CRO: free-shipping threshold, early-access email capture, pricing anchors and SEO-optimized product titles.

Digital Shelf Designer

Sep 2024 – Present

eStoreLabs (Ferrero USA) · Remote, US

- Design A+/enhanced content, PDP imagery and Brand Stores for Ferrero brands — **Nutella, Kinder, Ferrero Rocher, Tic Tac** — across Amazon, Walmart, Target, Kroger and Instacart.
- Run **A/B testing and PDP optimization** at scale, translating global brand guidelines into marketplace-native experiences built to convert at thumbnail scale.
- Designed the UX of the team's **internal AI copilot**, which scores marketplace imagery against best practices and prioritizes fixes.

Ecommerce & Campaign Designer (DTC)

Jul 2023 – Present

Planet of the Vapes · Freelance, Remote (EST team)

- Design launch campaigns, landing pages and lifecycle touchpoints across social, email/SMS and on-site — one visual system across channels.
- Built an AI-assisted production workflow for faster, on-brand output; apply UX principles to on-site discovery.

UX/UI Product Designer

Jul 2022 – Dec 2023

trades.org · Remote

- End-to-end UX/UI across parallel web products — research, prototyping and usability testing — plus a **scalable design system** (components, variants, documentation) shipped with engineering.

Ecommerce Designer · Shopify & CRO

Sep 2018 – Jun 2022

Casabianca Cycling Apparel · Remote

- Designed and optimized the Shopify store and brand system — restructured IA, product-page hierarchy and checkout for a calmer, more premium experience.

SELECTED PROJECT

Conversational AI Checkout Assistant (self-initiated) — a SaaS checkout and conversational assistant for payment recovery, billing transparency and context-preserving escalation, built end to end with an AI-assisted workflow (IBM Generative AI for UI/UX). **Full case studies at mordonez.com/work**
