PROFILE

Ecommerce Graphic Designer with **8 years** shipping assets that sell: Shopify stores, Amazon A+ and product-page imagery, and email & paid-social creative for DTC brands and marketplaces. I design the **Ferrero USA digital shelf** (Kinder, Nutella, Ferrero Rocher, Crunch) across Amazon, Walmart and Instacart, and use AI-accelerated production to move fast while keeping taste, brand rules and spec QA with me. Fully remote with US teams since 2018.

EXPERIENCE

Digital Shelf Designer

Sep 2024 – Present

eStoreLabs (Ferrero USA) · Remote, US

- Design and ship A+ content, product-page imagery, homepage and brand-store experiences for Ferrero USA brands — **Kinder, Nutella, Ferrero Rocher, Crunch** — across Amazon, Walmart and Instacart.
- Adapt strict global brand guidelines into platform-native, spec-compliant layouts, applying visual hierarchy and conversion principles to high-traffic product pages.
- Helped shape the UX of the team's internal **AI copilot** that scores marketplace imagery against best practices and prioritises fixes.

Ecommerce & Campaign Designer

Jul 2023 – Present

Planet of the Vapes · Freelance, Remote

- Design **campaign creative** for social, email and the online store on one visual system, from product-launch concept to delivery, for a DTC retailer.
- Apply UX and conversion principles to the shopping journey, and built an **AI-assisted production workflow** to raise output and keep creative consistent.

UX/UI Product Designer

Jul 2022 – Dec 2023

trades.org · Remote

- End-to-end UX/UI across multiple web products: research, wireframing, prototyping and usability testing to reduce friction in complex journeys.
- Built a **scalable design system** — components, variants and documentation — plus custom CMS/ATS workflows, enabling faster product iteration on consistent patterns.

Founder & Designer — DTC store

Jun 2020 – Dec 2023

MoaPrints · Self-employed, Remote

- Founded and ran a **direct-to-consumer store** selling my own illustration work — wall art, phone cases and accessories — for three and a half years.
- Designed the full product range and brand system and ran the storefront end to end: product pages, photography, listings, pricing and fulfilment.

Ecommerce Designer, Shopify & CRO

Sep 2018 – Jun 2022

Casabianca Cycling Apparel · Remote

- Designed and continuously optimised the **Shopify** store over four years — product pages, collections, campaign landing pages and brand system — for conversion and cleaner hierarchy.
- Rebuilt the checkout and store experience to feel calmer and more premium, and extended the brand into social, packaging and apparel product design.
